EXPERIENCE

BAGCAMPUS SUMMER INTERN | JUNE - JULY 2022 | REMOTE

VIDEO-CHAT-APP ReactJS | WebRTC | Firebase

- **Front-end:** Built a video chat app for the company from scratch by creating a responsive landing page, dashboard, signIn/signUp and in-call user interface, and linked everything by using React Routers.
- **Back-end:** Used Firebase to signIn and signUp page where the authentication was both done with Email and with Google. Also made sure that the call is connected throughout by accessing the Firebase Database the know the username, the user is logged in or not, and whether or not the user is connected to a call.

PROJECT(S)

INSTAGRAM CLONE ReactJS | Firebase | Apr 2022 | [\[Source Link\]](#)

- Built an Instagram clone using ReactJS as a front-end framework, with some Material-UI components.
- Used Firebase to tackle the backend part, which included authentication, storage and database. Hosted the web app in Firebase itself.

FOOD ORDER APP ReactJS | CSS | June 2021 | [\[Source Link\]](#)

- Built an Instagram clone using ReactJS as a front-end framework, with some Material-UI components.
- Used Firebase to tackle the backend part, which included authentication, storage and database. Hosted the web app in Firebase itself.
